ROHIT JANGID

JAVA / SPRING BOOT DEVELOPER | ANDROID DEVELOPER
Rajasthan, India | +91-9680699317 | rohitjangidrj396@gmail.com
GitHub: github.com/rohitt816 | LinkedIn: linkedin.com/in/rohit-jangid-bbba6a2a7

PROFESSIONAL SUMMARY

Java developer who builds full-stack applications end to end: Spring Boot REST APIs with MySQL, a React.js web frontend, and a native Android client with SQLite offline caching. Solid in OOP, Data Structures, and DBMS, and comfortable with role-based authentication, CRUD design, and Git-based workflows.

EDUCATION

B.Tech, Computer Science & Engineering | Parul University | 2023 – 2027 (Expected)
Class XII | The Creative Brain Academy Senior Secondary School, Rajsamand | 2022 | 75.20%
Class X | Emmanuel Mission Senior Secondary School, Rajsamand | 2020 | 85.67%

SKILLS

Languages: Java, C, JavaScript, SQL
Backend: Spring Boot, REST APIs, JDBC, Servlets, JSP, Hibernate, MVC Architecture
Android: Android Studio, XML, RecyclerView, CardView, SQLite
Frontend: React.js, HTML, CSS, Responsive Design
Database: MySQL, SQLite
Tools: Git, GitHub, Postman, IntelliJ IDEA, VS Code
Core CS: OOP, Data Structures, DBMS, API Integration

PROJECTS

Electric Vehicle E-Commerce & Service Management System
Tech Stack: React.js, Spring Boot, Java, MySQL, REST APIs, Git

- Built a full-stack platform for browsing, purchasing, and servicing electric scooters and accessories.
- Developed a responsive React.js frontend with product search, filtering, wishlist, shopping cart, and a customer dashboard.
- Designed Spring Boot REST APIs for authentication, products, orders, invoices, service booking, and customer profiles.
- Implemented role-based access (Admin and Customer) on an MVC architecture, backed by a MySQL schema for users, products, carts, orders, invoices, and service records.

Finance Tracker Android Application | GitHub
Tech Stack: Java, Android Studio, Spring Boot, MySQL, SQLite, XML, RecyclerView, CardView

- Built an Android app with a Spring Boot backend for tracking income, expenses, and categories.
- Developed REST APIs for income/expense data, user records, and category management, and integrated them with the app for data sync.
- Used MySQL on the server and SQLite for local caching, so the app stays usable with a poor connection.
- Designed the UI with XML layouts, RecyclerView, and CardView, using a modular OOP structure.

Samsung E-Commerce Frontend Clone
Tech Stack: HTML, CSS, JavaScript, REST API (fetch)

- Built a responsive e-commerce frontend inspired by Samsung's website with reusable UI components.
- Integrated a live weather REST API using JavaScript fetch to show dynamic data on the page.

INTERNSHIP EXPERIENCE

Data Science Intern | Mar 27, 2024 – May 09, 2024

- Cleaned and preprocessed real-world datasets in Python as part of data analysis tasks.
- Worked through structured data processing workflows and wrote organized, reusable code.

CERTIFICATIONS

- AWS Academy Graduate: Cloud Foundations (Credly Verified)
- Prompt Design in Vertex AI (Credly Verified)
